

# Life Cycle Evaluation Efforts Through Taking Part in Toyota Eco-VAS

We at Toyota Auto Body coordinate with Toyota Motor Corporation and material suppliers in making efforts in all emissions reduction activities that include assessing CO<sub>2</sub> emissions volume and emissions volume of atmospheric contaminating SOCs through the entire life cycle from vehicle “material manufacturing” , “production” , on through “disposal” .

Eco-VAS : Eco-Vehicle Assessment System

\*1.LCA : Life Cycle Assessment

(Comprehensive assessment based on the environmental impact of materials, vehicle production, vehicle driving, maintenance, and disposal)

\*2.Assessed with the comprehensive assessing method (LCA "Life Cycle Assessment") and by quantifying causes of vehicles on the environment at each level from access to resources through disposal and recycling in the action scope of Toyota Motor Corporation.
