

Resource Inputs and Emissions Volume in Business Activities

*1 Substance total : steel, plastic, paint etc.

*2 PRTR : Pollutant Release and Transfer Register (Specified chemical substance emission and transfer register)

*3 5 gases : 5 kinds of greenhouse gases excluding CO₂. Methane(CH₄), dinitrogen monoxide(N₂O), hydrofluorocarbon (HFC), perfluorocarbon(PFC) and sulfur hexafluoride(SF₆) (Toyota Auto Body emits only HFC134a)

*4 Recycling and other reuse indicates the volume of various possible valuable recyclable materials or the volume of inverse onerous contract materials. The disposal volume indicates whether substances are insufficient for processing or if the substances may be directly disposed of in landfills.

*5 For water volume consumed, the total water volume is large because initial rainwater is processed and then released.
