

# Creating Ever-Better Cars

## Results of Efforts to Manufacture Safe Vehicles

The Vellfire, developed jointly by our company and Toyota Motor, received the highest possible ranking in the Japan assessment.

The Land Cruiser 70 also achieved the top rank in the assessment in Australia.

The Vellfire achieves strong cabin for ensuring survival space in accidents while also offering a collision-absorbing body that improves occupant protection performance. In terms of pedestrian protection performance, we are using collision-absorbing constructions in the bumpers, hood, fenders, and cowl to lessen collision impact to the head and legs of pedestrians.
